

FES® EASYFLEX SYSTEM

The Forest FES® EasyFlex System allows customization of fold depth in your ripplefold drapery. FES works with all Forest track systems.

FES® FOREST EASYFLEX SYSTEM

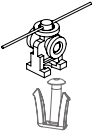

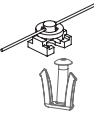

THE WORLD
BEHIND
YOUR
DRAPERIES

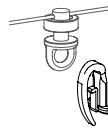

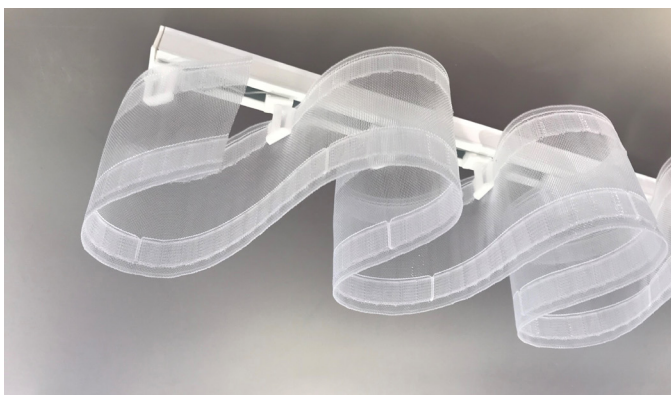

FES® FOREST EASYFLEX SYSTEM

- Fold depth is fully customizable with Easyflex tape and carriers.
- Use with any traversing system and your choice of ripplefold masters.
- Ceiling space required is equal to the spacing between the hook placement in the Easyflex tape.

FES	COMPONENT
• 	<p>Wheeled Connected Snap Carrier in plastic sleeve</p> <p>2107-25 60%, 2 5/8" OC</p> <p>2106-25 80%, 2 3/8" OC</p> <p>2105-25 100%, 2 1/8" OC</p> <p>2108-25 120%, 1 7/8" OC</p>
• 	<p>Two-Piece Connected Snap w/ Square Base in plastic sleeve</p> <p>2114-25 60%, 2 5/8" OC</p> <p>2111-25 80%, 2 3/8" OC</p> <p>2112-25 100%, 2 1/8" OC</p> <p>2115-25 120%, 1 7/8" OC</p>
• 	<p>9037-25</p> <p>Easyflex Hook</p> <p>use with 210X-25 and 211X-25 carriers</p>

FES	COMPONENT
• 	<p>2116-25</p> <p>Easywave Square Carrier, 80% use with 9039-25 Easyflex End Hook</p>
• 	<p>9039-25</p> <p>Easyflex End Hook</p>
• 	<p>9036-00</p> <p>Easyflex Tape</p> <p>3" wide, 9/16" spacing</p>

Redesigned Easyflex Tape
Redesigned Easyflex tape features a second row of pockets marked at 4" and 6" increments for quicker insertion of hooks at these standard fold depths.

Easyflex is designed so
draperies maintain their
folds from the moment
they are installed

WHAT MAKES EASYFLEX UNIQUE?

- » The smooth folding effect is always maintained whether the draperies are open or closed.
- » The system is designed so that the draperies maintain their folding effect from the moment they are installed.
- » The simple, yet stylish design makes the draperies easier to sew.
- » The Easyfold heading stacks back neatly, taking up less space than traditional pleated headings.
- » The carrier-cord is not visible when the drapery is fully closed.
- » Easy to take down and re-hang thanks to its detachable carrier-base.
- » Depending on the fullness selected, the Easyfold system can be more economical than more traditional draperies. (up to 33% versus regular pencil pleat drapery)
- » Can also be used in horizontally-curved tracks.

Fold depth is fully customizable with Easyflex tape and carriers. Ceiling space required is equal to the spacing between the hook placement in the Easyflex tape.

HOW DOES IT WORK?

- » The system is available in two types: Easysnap with metal snaps already fixed on the heading tape at a fixed distance, in combination with double sided Easysnap carriers; Easyflex with pockets on the heading tape, allowing for a flexible positioning of the hooks, in combination with Easyflex carriers.
- » Specially designed interconnected-carriers are contained within the drapery track.
- » This connection cord limits the extension of the drapery fabric, creating a smooth and continuous folding effect. When opened, the system enables the draperies to stack back neatly and straight.
- » Depending on the fabric type, a regular iron-on hem tape can be used with the Easyfold Tape at the top of the curtain to maintain a smooth appearance.
- » Transparent Easyflex tape with pockets allows for completely variable folds and any fullness desired, from 150% to 350%.
- » Easysnap Tape available in: white, black and transparent, in 4 inch and 6 inch spacing. Fullness options 180%, 200%, 270% and 300%.
- » Both Easysnap and Easyflex can be applied on all Forest drapery track systems.

WORKROOM INSTRUCTIONS

Forest understands that many workrooms will have their own method of manufacturing draperies. This guide is intended to give you a suggested make up method so you get the best from the Forest Easyfold system. When using your own fabrics, we suggest that sample draperies are made to determine whether:

1. It is suitable for use with Easyfold, and,
2. If so, which size of fold is most appropriate.
3. How many Easyfold carriers are exactly required to make up a particular size track.

In general, stiffer fabrics tend not to lend themselves well to Easyfold since they struggle to hold the soft curves for the drop of the drapery.

Once you have confirmed your fabric is suitable, you may want to consider using lead weight tape and drapery side weights for an improved finished appearance.

USE WITH MANUAL AND MOTORIZED TRACK SYSTEMS

Easyflex features a 3 inch high transparent tape with pockets, one roll is 100 yards. In the pockets you can fit the Easyflex hooks, which are the lower part of the Easyflex carriers. The carriers are available in 60%, 80%, 100% and 120% OC spacing. Easyflex end hooks are used to connect the drapery to the master carriers. The base of the first master carrier can be fixed onto the master carrier, to make sure the master carrier takes the drapery along with it.

Forest specializes in the development, production and supply of highly innovative drapery tracks and window coverings. We offer track solutions catering to the hospitality industry. Whether you choose our motorized tracks or rods, shades or hand drawn rods your client will experience comfortable luxury and optimal ease of use.

THE WORLD BEHIND YOUR DRAPERIES

More than thirty years ago it started with a flexible aluminum system, known as the Forest KS® system. The product line was expanded at a rapid pace, always focusing on functionality and quality. The technologies conquered the world. Hotels across the globe are satisfied users of Forest systems including iconic hotels like the Venetian, Hardrock and the mega hotels in Dubai.

Forest Group B.V. sells its products in more than 100 countries worldwide and has sales offices in The Netherlands, the United States, China, United Arab Emirates, United Kingdom and Poland, ensuring global availability.

Some well-known and recognized features of the Forest track systems are:

- **High-quality standards:** We guarantee a long lifespan.
- **Comfort and quiet:** Drapes open and close silently, creating a serene and comfortable environment.
- **Adds style to windows:** Always perfectly hanging drapery thanks to our systems, including motorized solutions.
- **Smart integration:** Controllable via app, voice, and home automation systems for ultimate convenience.
- **Sustainability:** We use a minimum of 75% recycled aluminum in our tracks.
- **Unique warranty:** 10-year warranty.
