SMART INTO THE FUTURE

SMART WINDOW TREATMENTS WITHOUT COMPROMISES

Many people are skeptical about digitizing their homes or view new technologies more as a challenge than an opportunity to make life easier. That's precisely why our smart products focus on simple setup, barrier-free integration into existing smart home solutions, data security, and future-proof technologies.

We offer motorized drapery rods that are incredibly user-friendly, comfortable to operate, and can be controlled with various smart devices across different systems.

When planning interior design, smart homes are becoming an increasingly essential component to ensure that later, all elements can work together in perfect harmony. Especially with window treatments, this often meant having to make compromises when choosing designs, finishes, or additional motor mounting options.

We are revolutionizing motorized drapery systems and will offer you an unprecedented variety of nearly unlimited possibilities in the future.

We present Motor Technology 2.0 . . .

REVOLUTIONARY

SIMPLE YET INNOVATIVE

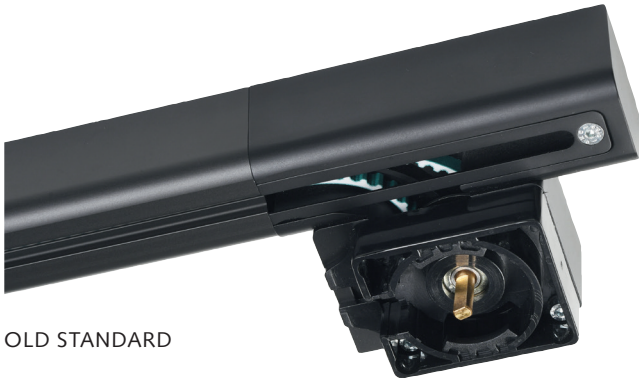

More than 20 years ago, we entered the world of motorized drapery systems and have been pioneers ever since. We were the first manufacturer to place the motor behind the profile, setting a new standard. With the new Motor Technology 2.0, we are taking another revolutionary step. The idea is as simple as it is innovative because regular drapery rods can now be motorized. From the front and the sides, our motorized rods can no longer be distinguished from classic ones.

Thanks to cutting-edge technology and absolute precision, we now mill the necessary recess for the motor connection directly into the profiles, so a separate motor housing is no longer required.

USE WITH ANY FOREST SHUTTLE MOTOR, OR USE WITH A SOMFY, LUTRON, OR ROLLEAVE MOTOR YOU PURCHASE.

PERFECT DOWN TO THE LAST DETAIL

OLD STANDARD

NEW MOTOR TECHNOLOGY 2.0

Previously, color deviations could occur despite high-precision manufacturing techniques and using the finest materials. To meet our high standards, we developed an alternative – the new Motor Technology 2.0. Now, we integrate the motor pulley directly into the profile, achieving a consistent finish color.

The new Motor Technology 2.0

Motorization re-imagined, transforming the motorized market

- Visual perfection with consistent finish color
- Significantly expanded collection of profile options
- Expanded selection of finishes
- Combinations available with all end caps and finials
- Less components
- Environmentally friendly thanks to material savings
- Improved pricing structures, greater customer base

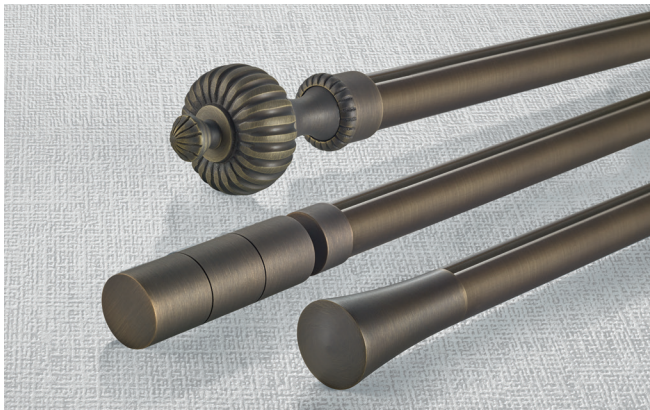

Motor Technology 2.0 will maintain a continuous channel, perfect for ripple fold across the entire system width.

A DESIGNER'S DREAM

ONE OF THE WORLD'S LARGEST COLLECTIONS

Even before Motor Technology 2.0, our motorized drapery rod collection was one of the largest in the world. Now, it continues to grow, leaving no interior design wish unfulfilled.

Whether basic, high-end, or design award winner; from classic satin nickel to trendy satin brass, there are no limits to design options. Four styles, 6 high-quality finishes, numerous finials, and various brackets offer unprecedented variety with nearly unlimited possibilities.

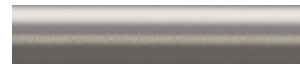

DRESDEN 1 1/8 inch

-22 polished chrome

-24 satin brass

-29 satin nickel

-48 matte white

-59 black

-70 bronze
